Website: www.ealp.it

The area faces great problems of environmental conservation, considering, in addition, that the territory is characterized by areas of particular touristic and landscape value.

EALP is a member of Renael, the national network of Italian Energy Agencies

EALP has institutional aims and provides technical support to the local Administrations for Energy Planning and for the development of activities connected with energy sector, to promote RES and RUE and co-ordinates strategies in terms of energy and exchange of know how.

European / local projects

Among others, these are the projects where Ealp was involved in in the latest years:

Most important activities

- ✓ Check on **thermal plants** in Livorno province area as foreseen by present national laws foresees (D.Lgs 192/05 e s.m.i. e DPR 412/93 and others)
- ✓ **Energy audits** aimed at energy saving and the use of RES addressed to Public buildings and schools
- ✓ **Information and dissemination:** Seminars, conferences, workshops, technical visits.
- ✓ Environmental and **energy education** to all kinds of schools in Livorno province area
- ✓ **Vocational training** for public employers (technicians), professionals and for companies working in the energy / RES sector
- ✓ **Info point** for giving advice to citizens and Companies for **Raising Awareness** of citizens, consumers and energy users
- ✓ **Researches and innovation**
- ✓ **Consultancy for citizens** for supporting them in getting financial support for RES installation
- ✓ **Energy planning, Feasibility studies and projects** for public bodies aimed at the implementation of plants powered with RES and at energy saving
- ✓ **Participation** in European & national energy programs and networks.
