

ManagEnergy

ManagEnergy is a technical support initiative of the European Commission's Intelligent Energy - Europe (IEE) programme that focuses on sustainable energy actions at the local and regional level. The initiative is primarily aimed at local and regional public authorities, as well as energy agencies and other organisations with a public mission that work on sustainable energy.

ManagEnergy offers a wide range of tools and services, including the [ManagEnergy website](http://www.managenergy.net) and Education Corner, capacity building workshops across Europe, an annual call for case studies and an annual conference, publications and electronic newsletters as well as numerous networking opportunities for energy actors.
